Defy the Elements!

Jennite®

No other pavement sealer lasts longer

Jennite®

No other pavement sealer lasts longer

Jennite®
65
YEARS

Jennite has been the standard of excellence in asphalt pavement protection since 1938.

Preserve your valuable investment with the best protection possible!

VALUE

- ▼ Rely on our many years of experience for expert guidance in choosing the best pavement management solution for your property.
- ▼ You can trust our national network of insured and trained Jennite application experts and avoid the risk of using unproven contractors.
- ▼ Jennite contractors are equipped to complete your projects efficiently and ensure superior results using consistent, high-quality products and standardized specifications.
- ▼ Save travel time and logistical costs managing multiple properties by using our national network, ready to serve you in one location or many.
- ▼ Jennite delivers the longest lasting asphalt pavement protection with the lowest annualized cost as well as the advantage of being a fully deductible maintenance expense.

DUAL WARRANTY

The Jennite Surfacing System offers protection that no other product or contractor can provide: a **written dual performance warranty**. Neyra Industries works in partnership with our licensed Jennite contractors to offer you this unique protection: the manufacturer warranties the product and the contractor warranties the installation.

Only Jennite trained and licensed contractors can buy and apply the Jennite Surfacing System. Neyra Industries delivers a Certificate of Authenticity with every Jennite shipment. Call us to verify that genuine Jennite is protecting your investment.

endurance

BENEFITS

- ▼ Prolong the life of your asphalt pavement and expect over three times the wear life with Jennite's high solids formula.
- ▼ Protect and preserve your pavement and defy the elements with Jennite's tough, tight waterproof seal.
- ▼ Avoid costly repairs, reduce maintenance expenses and minimize business interruptions with Jennite's long lasting protection.
- ▼ Jennite provides a seamless, skid-resistant even-textured surface, recreating that rich, black "brand new" look. Your pavement will be safer and easier to clean.

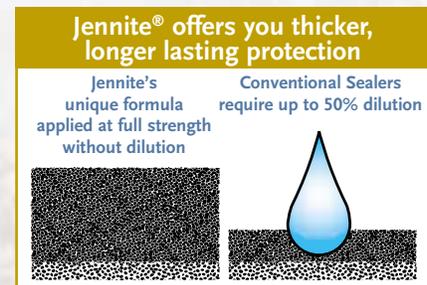

Abrasion tests from independent labs prove Jennite will outlast any pavement sealer.

advantage

ENGINEERING & DESIGN

- ▼ Non-vulcanized, high molecular weight polymer is hot blended into the resin base of Jennite prior to emulsification. This unique process increases resistance to oil, gasoline, chemicals and salt.
- ▼ Jennite's rubberized binder is reinforced with geotextile fibers, which increase strength and resistance to cracking and raveling.
- ▼ Refined ceramic clays enable Jennite to be applied at full strength, providing maximum thickness and protection against destructive water penetration and UV rays, keeping your pavement blacker longer.
- ▼ Jennite predates and exceeds the composition and performance standards of ASTM, the FAA, the Air Force and Federal Spec. RP-355.
- ▼ Jennite is the only product that meets the material requirements of USGS-02788N: *Unified Facilities Guide Specification*.

security

LICENSED CONTRACTORS

- ▼ For maximum performance, pavement sealer must be applied properly. Only experienced and reputable contractors are trained and licensed to apply the Jennite Surfacing System.
- ▼ We collaborate with these contractors to continually update technical information and application techniques.
- ▼ For your protection, Jennite pre-qualified contractors receive an applicator license number. They are also bonded, and carry liability and workmen's compensation insurance.
- ▼ These professionals meet state and local permit requirements and are trained to comply with environmental and OSHA regulations.

You're in good company with Jennite.

With over 1200 locations across the country, W.W. Grainger has used the Jennite network of licensed contractors to help maintain their properties much more consistently and cost effectively.

When Wal-Mart launched a national expansion and renovation project for older stores, their engineering and design studies concluded Jennite was the longest wearing coating and most cost effective protection for reconfiguring their high-traffic parking lots.

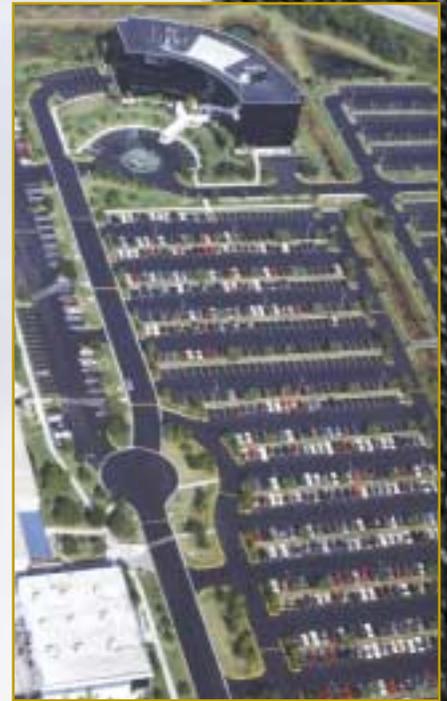

Marriott International, Inc. has a reputation for extraordinary attention to detail and pride in their physical surroundings. It's no wonder they have chosen the Jennite Surfacing System for properties across the U.S.

Jennite is specified by more architects and engineers than any other sealer in the world. Here are just a few companies that have also chosen this proven system: *P&G, General Motors, NASA, Disney, IBM, Motorola, AutoZone, Bank One, Home Shopping Network, McDonald's, Toys 'R' Us, Whirlpool, State Farm, Tampa International Airport, and State DOT approved bridge deck waterproof membrane system.*

Experience the Jennite difference.
